

Engineering / Rolling Stock Maintenance Technician

THE ROLE

Reporting to Senior Technician, the role is to perform and coordinate preventive and corrective maintenance activities on LRTs and associated depot plant / Electrical & Mechanical (E&M) equipment according to maintenance schedule in order to provide a safe, reliable and effective train service and to meet the operational objectives.

RESPONSIBILITIES

- Inspect, repair and replace components and equipment on LRTs and associated depot plant and E&M equipment to ensure they are properly maintained according to service standards in a timely and safely manner.
- Investigate and analyze the causes of failure and propose corresponding rectification work to ensure service availability of LRTs and other depot equipment.
- Conduct modification, tests & trials and fleet check according to instructions and requirements stated in Work Instructions and relevant engineering documents for improving service performance.
- Carry out Safety Independent Check on all safety critical items and commissioning check after contractors' work completion to ensure the operational safety.
- Complete quality documents and relevant maintenance records after work done.
- Perform shunting movement to facilitate maintenance, LRT dispatching and cleaning activities within depot.
- Conduct emergency rescue for LRTs and other rolling stocks at mainline and depot whenever required, so as to minimize impact to traffic in case of incidents.
- Perform ad-hoc assignments and projects as assigned.

REQUIREMENTS

- Minimum 2 years relevant working experience or above; fresh graduate with relevant Bachelor Degree in Electrical / Mechanical / Electronic Engineering or equivalent engineering disciplines are welcome.
- Able to comprehend and write simple English and good command of written and spoken Chinese.
- Holder of valid Macau driving license class B or C is preferred.
- Able to work on shifts including overnight, weekends and holidays.
